

It's a fact - 85% of home buyers now see their new home first online, before they ever see it in person. The problem is that there are so many properties listed online, that it is hard to make yours stand out from the crowd.

Solution? My Internet Advantage Service Package.

There are 8 EXTRA things I can do, using online and print media resources in combination, that will help to sell your property.

1) I create a comprehensive, dedicated website for your property, and yours alone, with its own easy-to-remember domain address (URL), (see BobFoster.ca for examples),

2) I create custom slideshow and video presentations of your property, embedded on your website,

3) Your video is posted on YouTube,

4) I develop high quality, weather proof (laminated), flyers for your property, which are made available both at open house sessions and directly from a mailbox on your integrated signpost system,

5) Your website address is advertised right below your For Sale sign,

6) Your property is listed on KIJJI, with a link to both your YouTube video and your custom website,

7) Your property is advertised online on multiple other websites, with links to your custom website, and

8) All print media ads, including ads in the glossy Homes and Lands magazine, also provide links to your custom website.

The result is that 75% of the people who come to my open house sessions are not "tire-kickers". They have already seen your website and video and there to see property in person.
